

GLO400-08 FIBRE CLEANER

Features

- Designed for all kinds of simplex connectors
- Compact sized for instant hand-held operation
- Dry-clean without the use of harmful substances
- Replaceable cartridge
- Made with anti-static material

The compact, and ergonomic design of the GLO400-08 Fibre Cleaner unit permits single handed operation. The operation of the Fibre Cleaner unit is as simple as depressing the red lever on the side of the unit, which opens the protective cover, advances the cleaning fabric thereby exposing the next controlled strip of clean fabric. The Fibre Cleaner has been specifically designed to offer the user a revolutionary, portable, packet sized cleaning solution for fibre optic connectors.

The Fibre Cleaner is initially supplied with a removal cartridge containing the cleaning fabric which supports 400 cleaning cycles. Replacement cartridges can be purchased and installed into the Fibre Cleaner, by the simple operation of unscrewing two retaining screws on the side of the unit. The cleaning fabric has a super fine cross woven weave, which permits dry cleaning of fibre optic connectors, through the action of two wipes down the length of exposed cleaning fabric. Extensive test data exists to demonstrate that the cleaning cycle is effective at removing fingerprint contamination, dust and other particle contamination, residues of Isopropyl Alcohol and other liquid and organic contamination, which has the potential to adversely impact the operational performance of fibre optic connector interfaces.

Specifications

Handset

Model	GLO400-08
Driving Method	Manually-pressed, fixed-length forwarding
Dimension (mm)	134(L) x 100 (W) x 36(D)
Weight	< 85g

Cartridge

Model	GLO400R-08
Cleaning Capacity	400 Wipes
Cleaning Slot	2 Slots
Applying Connector	2.5mm : FC, SC, SC2, ST
	1.25mm : MU, LC
Weight	< 50g
